

# ESP® PROGRAM

## FLEX ENROLLMENT OPTION

SPECIFICALLY DESIGNED FOR OPERATORS OF IN-SERVICE ENGINES

### THE FLEX OPTION

- Available in conjunction with each of the four popular ESP® Program coverage levels: Gold, Silver, Gold Lite, and Silver Lite
- Significantly reduces the upfront payment required for hours flown prior to enrollment
- Payment for the balance of hours flown prior to enrollment can often be deferred as far out as overhaul
- Results in full ESP® Program engine maintenance cost predictability
- Credit provided for scheduled HSI performed prior to enrollment
- No enrollment administrative fees, monthly management fees, or variable and unpredictable pro-rata charges
- Renewable and transferable to subsequent owners, globally
- Engines are serviced by the worldwide P&WC Service Centre Network
- Fully backed by the manufacturer, with over 80 years experience in the industry

As part of P&WC, the ESP® program is much more than just a trust fund or financial instrument. We have the facilities, the parts, the rental engines and the experts to ensure that you and your Pratt & Whitney Canada engine(s) are provided with the premium service expected from the manufacturer.

### HERE'S HOW IT WORKS

- Select one of the four ESP® program coverage levels
- Upon enrollment, make a relatively small Initial Payment based on a percentage of the current TTSN or TSO
- Payment for remaining hours flown prior to enrollment can be deferred and are typically only due prior to an engine overhaul event
- Enjoy the benefits of ESP® Program coverage
